TIME SERIES PROFILE EXPLANATORY NOTES

INTRODUCTION

- 1. The Time Series Profile provides 22 tables comparing data from the 1991, 1996 and 2001 Censuses where the classifications are comparable and based on 2001 SLA boundaries. These tables are available for the following geographic levels: SLA, LGA, SSD, SD, S. Dist., State, Australia.
- 2. Information was collected from the 1991, 1996 and 2001 Census of Population and Housing.
- 3. Each table title in the Time Series Profile consists of two parts. The first part lists the variables included in the table. The second part describes the table population.
- 4. A glossary of terms and concepts used in the Time Series Profiles appears below.
- 5. For more information on classifications and Census concepts see the 2001 Census Dictionary (Cat. No. 2901.0).

GLOSSARY

Australian Capital Territory

6. In 1996 and 2001 Jervis Bay was not included in the Australian Capital Territory. Therefore, to ensure comparability across Censuses, Jervis Bay has been excluded from the Australian Capital Territory in 1991.

Australia

7. To ensure comparability across Censuses, in 1996 and 2001 total Australia includes 'Other Territories', ie: Jervis Bay, Christmas Island and Cocos (Keeling) Island.

Concordances

8. In the Time Series Profile some classifications have been redefined to obtain data comparability between Censuses. Footnotes have been added to the tables wherever possible to indicate these concordances. (Items 6 and 7 are examples of concordances).

Employed full-time/part-time

9. In 1996 and 2001 'employed full-time' means that the person worked 35 hours or more in all jobs during the week prior to Census night. In 1991, 'employed full-time' means that the person worked 35 hours or more in the main job held during the week prior to Census night.

Family

10. In 1996 and 2001, 'employed part-time' means that the person worked less than 35 hours in all jobs during the week prior to Census night. In 1991, 'employed part-time' means that the person worked less than 35 hours in the main job during the week prior to Census night.

11. For Census purposes, people who stated they were employed, but worked zero hours in the week prior to Census night have been coded to 'employed part-time'.

12. A family is defined as two or more persons, one of whom is at least 15 years of age, who are related by blood, marriage (registered or de facto), adoption, step or fostering, and who are usually resident in the same household. Family tables include same sex couples unless otherwise indicated.

Households

13. Occupied dwellings in Manufactured Home Estates and units in Accommodation for the Retired or Aged (self-care) have been classified as occupied private dwelling in 1996 and 2001. In 1991 they were classified as non-private dwellings. For Time Series purposes, the Household and Dwellings tables (T17 - T21) and the Selected Averages table (T22) have these dwellings and persons living in these dwellings excluded from the 1991 data.

14. A household is defined as a group of two or more related or unrelated people who usually reside in the same dwelling, who regard themselves as a household and who make common provision for food or other essentials for living; or a person living in a dwelling who makes provision for his/her own food and other essentials for living, without combining with any other person.

15. For Census purposes, the total number of households is equal to the total number of occupied private dwellings.

Housing Loan Repayments

16. For the first time, the 2001 Time Series Profile includes housing loan repayment comparisons across Censuses. Housing Loan Repayments are calculated on the ranges as stated. These have not been indexed to a constant base.

Income

17. For the first time, the 2001 Time Series Profile includes income comparisons across Censuses. Incomes are calculated on the ranges as stated. These have not been indexed to a constant base.

TIME SERIES PROFILE EXPLANATORY NOTES(cont'd)

Indigenous Status	18. The 1996 Census was the first Census to allow a person's origin to be recorded as both Aboriginal and Torres Strait Islander. In 1991 only one or the other could be recorded.		29. Median weekly individual income is applicable to persons aged 15 years and over.
Industry	19. The industry classification is an indication of the main job only.		30. Median weekly family income is applicable to families in occupied private dwellings. It excludes families where at least one family member aged 15 years and over did not state an income and families where at least one family member aged 15 years and over was temporarily absent.
Labour Force	20. Please refer to the 2001 Census Fact Sheet on Labour Force for an assessment of the comparability between Labour Force Survey and Census data		31. Median weekly household income is applicable to occupied private dwellings. It excludes households where at least one member aged 15 years and over did not state an income and households where at least one member aged 15 years and over was temporarily absent.
Nfd	21. Nfd means 'not further defined'.		32. Mean household size is applicable to number of persons usually resident in occupied private dwellings. It includes partners, children, and co-tenants (in group households) who were temporarily absent on Census night. A maximum of 3 temporary absentees can be counted in each household.
Occupation	22. The occupation is an indication of the main job only.		
Other Territories	23. A Time Series Profile is not available for 'Other Territories'. Data however, is available through our consultancy service.		
Overseas visitors	24. Overseas visitors are defined differently to the 1996 and 1991 Census. In 1996 and 1991, an overseas visitor was any person who stated they would be in Australia for less than 6 months. For the 2001 Census, this has been extended to any person who states they will be in Australia for less than 12 months. 25. In the 1996 and 2001 Censuses, overseas visitors were treated differently compared to previous Censuses. In 1996 and 2001 only age, sex and registered marital status were recorded for overseas visitors, whereas in previous Censuses information on all topics at the person level was recorded. Therefore, in 1991, data has been extracted from classifications and separately categorised where appropriate to give comparability across Censuses.	Social Marital Status	33. Social Marital Status is the relationship status of an individual with reference to another person who is usually resident in the household. A marriage exists when the two people live together as husband and wife, or partners, regardless of whether the marriage is formalised through registration. In the 1996 and 2001 Censuses, where information about same-sex couples was volunteered in the relationship question, it is included in the family coding and classified as a partner in a defacto marriage. In 1991 living arrangements of same-sex couples were not identified.
Place of Enumeration	26. The Census count, based on place of enumeration, is a count of every person who spent Census night in Australia. People are counted where they are on Census night, which may not be where they usually live.	Table population	34. Table population is a description of what the table is counting. For example, tables containing marital status usually have a table population of persons aged 15 years and over. The population appears under the table title.
Rent	27. For the first time, the 2001 Time Series Profile includes rent comparisons across Censuses. Rents are calculated on the amounts as stated. These have not been indexed to a constant base.	Tenure Type	35. In the 1996 and 2001 Censuses, the number of categories in the tenure type classification have increased and now include 'being purchased under a rent/buy scheme', 'being occupied rent-free' and 'being occupied under a life tenure scheme'.
Selected Averages	28. Median age excludes 'Overseas visitors'.		

TIME SERIES PROFILE EXPLANATORY NOTES (cont'd)

DATA QUALITY	<p>36. For further information on the data quality of Indigenous census data, see Population Distribution, Aboriginal and Torres Strait Islander Australians (Cat. No. 4705.0). This publication presents counts for Aboriginal and Torres Strait Islander Australians from the 2001 Census for Indigenous geographic areas, accompanied by information on data quality to help interpret the data. Population estimates of the Indigenous population based on the 2001 Census are also included. For comprehensive information on the quality of Indigenous census data, see Population Issues, Aboriginal and Torres Strait Islander Australians (Cat. No. 4708.0).</p> <p>37. The Census is subject to a number of inaccuracies resulting from errors by respondents or mistakes in collection or processing of the data. Some of these are overcome or 'repaired' by careful processing procedures and quality management of the processing itself. The effect of those that remain is generally slight, although it may be more important for small groups in the population. The main kinds of error to keep in mind are:</p>	<p>Respondent error</p> <p>41. Processing procedures cannot detect or repair all errors made by persons in completing the form, therefore some may remain in final data.</p>
		<p>Undercount</p> <p>42. Although the Census aims to count each person once, there are some people who are missed and others who are counted more than once. A post enumeration survey is conducted soon after the Census to measure the undercount.</p> <p>43. Further information on data quality will be provided progressively in Census Updates and in the 2001 Census fact sheets and working papers.</p>
Partial non-response	<p>38. In some cases where an answer was not provided to a question an answer was imputed or derived (often from other information on the form). In other cases a 'not stated' code was allocated.</p>	
Processing error	<p>39. While such errors can occur in any processing system, quality management is used to continuously improve the quality of processed data, and to identify and correct data of unacceptable quality.</p>	
Random Adjustment	<p>40. Cells containing small values are randomly adjusted to avoid releasing information about particular individuals, families or households. The effect of random adjustment is statistically insignificant.</p>
